Yunyu Hu 胡芸毓

Cross-disciplinary product person bridging design research, engineering and human-computer interaction. Experience taking AI-driven hardware and software products from user research through working prototype, redesigning national-scale digital services, and presenting original research at international academic venues.

I treat user research and rapid prototyping as the fastest path from ambiguity to a shippable decision — paired with enough technical fluency (Python, React, Unity) to work directly with engineers on scope and feasibility, rather than handing off a spec and hoping.

SELECTED WORK

M.S.

M.S. Thesis — Human-AI Trust & Collaboration
In progress

NCCU

- Independently designed intention-signaling cues and an experimental system for human-AI collaboration, examining how intention communication affects trust and collaboration outcomes, and translating the findings into AI interaction design recommendations.

NHI

National Health Insurance App Redesign
2025

- Restructured information architecture and three core flows (medication records, appointment lookup, premium payment) around chronic-disease patients and the general public through user research.
- Ran a follow-up study evaluating where generative AI could — and could not — reliably replace manual design steps in the same workflow.

MM

MetroMate — AI Travel Companion
2025

- Designed an AI agent for commuters covering route reminders, disruption alerts and personalized travel suggestions — from persona work and journey mapping to conversational flow.

FT

FlexiTouch — Soft-Material Interaction for Game Experience
2024

TAICHI Best Demo · League of VR Best Technical Award

- Designed a press-and-stretch soft-material controller that turns physical touch into in-game feedback, shaping a full game-interaction experience around it.

WG

WallGuard — AI Wall-Hazard Recognition
2024

Exhibited at InnoFest@ICI

- Directed product framing for a YOLO-based real-time detection system addressing Taiwan's earthquake and aging-building risk; scoped rental-inspection and insurance-assessment use cases.

EXPERIENCE

National Chengchi University — TA, Human-Computer Interaction Design — 2025–2026

Taiwan Design Research Institute (TDRI) — Design R&D Intern — 2025

FreeSEED R2 — UX Designer — 2025

National Chengchi University — TA, Design Thinking & AI — 2025

OpenHCI 24th — Technical TA, Unity AR + LED + sensor project — 2024

MR Creative Lab (Prof. Chia-Nien Chou), NCCU — Research Assistant — 2024

Media Psychology Lab (Prof. Rih-Suan Lin), NCCU — Research Assistant — 2023

PTSC (Pershing Technology Services) — FinTech Intern — 2023

National Chengchi University — TA, Mobile App Development — 2022

Fu Jen Catholic University, Dept. of Information Management — Computer Lab Assistant — 2021

RESEARCH & RECOGNITION

- Invited by NCCU to present at the **2025 SNU–UTokyo–NCCU Joint Symposium**, Seoul (Nov 2025)
- Presenter, **TAICHI'25 / InclusiGen** — 11th Annual Conference of the Taiwan Association of Computer-Human Interaction (Aug 2025)
- **Best Demo, TAICHI 2024** & **Best Technical Award, League of VR Final 2024** — FlexiTouch

sandyfuoo68@gmail.com

Taipei, Taiwan

SKILLS

Product & Research
User research, journey mapping, information architecture, usability testing, A/B evaluation

Design Tools
Figma, Adobe XD

Technical Fluency
Python, JavaScript, React, Unity, MySQL, Firebase, AWS

Languages
Mandarin (native), English (professional)

EDUCATION

National Chengchi University
M.S. Digital Content & Technologies
2023 – Present

Tsinghua University
Exchange – Info Art & Design (Future Lab)
Jan – Jun 2026

Fu Jen Catholic University
B.S. Information Management · GPA 3.8
2019 – 2023

AWARDS

TAICHI 2024 — Best Demo, FlexiTouch

League of VR Final 2024 — Best Technical Award

InnoFest@ICI 2024 — WallGuard exhibitor

AI Junior Award 2024 — Finalist, iHarbor

National Collegiate Innovation Competition 2022 — 1st Place & Best Attention Award, DeepLink
